

[BEST SINGLE-FAMILY DETACHED HOME UP TO 1,800 SQUARE FEET]

Small House, Big Impact

Located in a traditional neighborhood development called Habersham, the Erickson residence is designed for livability and entertaining. It's only 1,449 square feet but lives much larger by taking advantage of outdoor living. There is a covered front porch, as well as a screened porch with a fireplace off the family room and a rear courtyard. Sight lines from the front entry to the screened porch heighten the sense of spaciousness. A strong emphasis was placed on simple massing, unassuming details and the economical use of materials.
