DOMINICK TRINGALI ARCHITECTS ANNOUNCES THE GRAND OPENING OF THE NEW "HOT SPOT" IN NORTHERN MACOMB COUNTY

Santino's Italian Restaurant, Sports Bar & Martini Lounge is uniquely composed of three separate areas, each with entirely different functions - a casual, urban sports bar, a sleek and contemporary martini lounge, and a high-end Italian Restaurant which is expected to be open by late Summer. The architectural design and building materials throughout the space are attracting people from all over Southeast Michigan, and play an important role in the success of this venue since its Grand Opening on Thursday, July 9.

Imagine sitting at a table on a second-floor sports bar, watching your favorite teams play on state-of-the-art television equipment that surrounds the entire space. The walls around you are made of roll-up garage doors which will remain open for the majority of the year. The garage doors enable fresh air to circulate through the building as well as provide a unique way to transition the interior of the space with the outdoor patio. The interior is designed to be trendy yet comfortable, with brick walls and archways, colorful and contemporary lighting fixtures, and other unique materials that are not common in restaurants and bars around this area.

The martini lounge features a crisp, clean, plush elegance. Guests entering the lounge can immediately sense an organic, fluid motion with curved walls and ceilings that help move people through the space. The lounge offers the option to relax and enjoy a drink on the leather couches or to dance to a variety of music on the dance floor. The lighting fixtures are state of the art and the highlights of the lounge are the glowing walls and the countertop, which is composed of thousands of tiny light bulbs that flash in rhythm with the music.

The third area inside Santinos is the Italian Restaurant, which is nearly complete. This space features a simple, comfortable elegance, with clean, rigid lines and furnishings that welcome guests inside. The menu consists of a authentic, gourmet Italian Cuisine.

The architectural challenge presented during this project was designing three separate spaces inside an existing building, each with its own identity while still seamlessly transitioning into the others. The overall goal as the project architect was to implement design ideas and features that would create a buzz and draw people inside, in an economy where so many people are cutting back. Good design is playing an increasingly critical role in enabling entrepreneurs and owners of new businesses such as Santino's, to achieve the success and results they are looking for.

Santino's is located at 59259 Van Dyke Washington Township MI 48094, on the West Side of Van Dyke, just North of 27 Mile.
